

Product Announcements from Motorola & Zebra

Motorola releases their first tablet - the **ET1 Enterprise Tablet!** This is an Android OS device and is built to last with a three-year life cycle. It has a 7" screen and weighs under 1.5 lbs. Offers rechargeable batteries for quick swap out and allows for multiple users. Rock solid security with data encryption. The ET1 also has many accessory options including: scanner module, multi-docking cradles, battery-charging accessories, built-in ports, and more. This webinar will dive deeper into the specs of the unit.

MC9090-G End of Life Date is Announced. The book date is April 13th, 2012. The last ship date is July 13, 2012 and they are supported for 5 years making their service support through July 13, 2017. The replacement unit is the MC9190-G. We will review the MC9190 and the upgraded features that it has versus the MC9090 (this includes the OS, memory, and scan engine options).

Zebra Mobile Terminals – Zebra's family of mobile printers includes:

- P4T, a Thermal Transfer printer, and can include RFID.
- QLn is the next generation of the QL Plus label printer.
- RW rugged receipt printer is a leader in the DSD field.

These printers can communicate by cable, 802.11, or Bluetooth giving you the flexibility to use where needed – in the warehouse or outside the four walls.

Label Design Software integration into many ERP's including SAP and Oracle. The software allows the user to design their own labels to fit their needs or the needs of their customers.
