

## **Soti – Mobicontrol is an Enterprise Device Management for Smartphones, Tablets & Rugged Devices.**

This mobile management software works on Apple iOS, Android and Microsoft Window/CE products. This is an inexpensive, feature-packed product that allows your IT department to manage, support, secure and track devices.

### Overview/Highlights:

**HelpDesk** – Equips support personnel with remote control allowing you to work on the unit from your desk along with helpdesk tools to diagnose and fix problems efficiently.

**Device Provisioning** – Create group policies make it easy to automatically deploy software and data to devices in the field in real-time over any network (WiFi, cellular, cradled, etc.).

**Location Services** – Provides the ability to locate, track and gather information on the movement of your GPS enabled devices, no matter where they are in the world.

**Advanced Security** – Provides administrators with granular control over how mobile devices are used and how data is accessed, keeping corporate information in authorized hands only.

**Asset Management** – Allows support personnel to track hardware and software assets at any time. Dynamic grouping management allows devices to be automatically grouped based on organizational structures or locations.

**Alerts!** - Proactively monitors device-side and server-side system events and triggers immediate notifications to keep administrators informed on live mobile activity.

**Reporting** – Provides advanced data collection gives businesses the power to view and store a wealth of live device information and generate numerous reports for essential business analytics.

**CRM** – Allows IT support teams to collaborate on support issues and save time by tracking cases and their history
