

BCCD'S TranASAP Data Collection Software Moving Data To and From SAP ASAP

BCC Distribution, Inc. has developed an inexpensive, real-time, automated data collection system that utilizes SAP screens in a mobile environment.

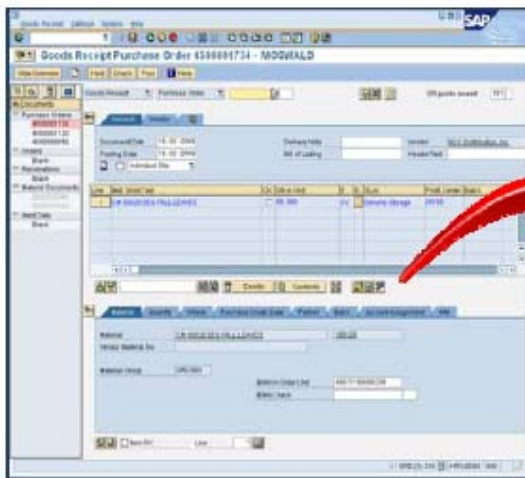

BCC Distribution, a national certified distributor of integrated barcode solutions; designed an SAP standardized, turn-key inventory scanning system that utilizes the SAP's Inventory Management, Warehouse Management and Production Modules. TranASAP is a barcode inventory scanning system that integrates with SAP's ERP software. There are two versions of TranASAP – Console and ITSmobile/Netweaver. TranASAP Console utilizes SAP's Console Software, while TranASAP ITS mobile/Netweaver integrates into SAP ERP through SAP's ITSmobile software and web browser technology. Both allow for real-time, interactive SAP native scanning communications.

BCCD's TranASAP Inventory Tracking System gives a company the ability to scan, track inventory, and validate inventory accuracy throughout the business process. The complete solution is comprised of radio frequency scanning hardware (running VT220 terminal emulation, CE or Windows Mobile), barcode printing hardware (utilizing Ethernet, RF, Serial or parallel connectivity), SAP's standard software transactions, TranASAP Software, BarTender Label Software and BCCD's implementation and support services. TranASAP is a transaction based system. Clients purchase only the transactions needed and only when they are needed. This methodology allows BCCD's customers to implement a complete SAP integrated barcode scanning system; quickly, easily and inexpensively.

TranASAP, version ITSmobile, is the latest edition to the TranASAP family. This software version continues to allow for real-time transaction based integration into SAP utilizing Windows Mobile handheld or CE scanning terminals. TranASAP's newly developed and growing software allows for easy integration and execution of RFID equipment, PLC's, Scales, Voice and Field Sales.

Example of Transaction Screens:

SAP Transaction on a PC

SAP Transaction on a Mobile Device with TranASAP

BCCD's TranASAP solution is the most affordable and adaptable software to a company's ever changing requirements. It's the key to your mobile SAP solution, delivered ASAP.

The Complete Source For All Your Barcode Needs!

TRANASAP TRANSACTIONS (SAP ERP) INCLUDE:

CO11N	LM60	LT12	MIGO
CO12	LP12	LT13	MMBE
H401	LS04	MB01	VL02N
H403	LS24	MB1A	VL09N
LI01	LS25	MB1B	Z-Custom
LI04	LS27	MB31	Transactions
LI11	LT01	MB52	
LM58	LT07	MFBF	
LM59	LT11	MI04	

****See BCCD for a complete up-to-date list of TranASAP transactions.*

BCCD'S TRANASAP UTILIZES THE FOLLOWING TECHNOLOGIES IN R.F. TRANSACTIONS:

- SAP Approved Communications (Console or ITSmobile)
- Telnet Server Software or ITSmobile Netweaver
- SAP Version 4.0 and above
- ASAP Implementation Methodology (Road Map)
- BarTender - Connecting Barcode Printers to SAP
- Server – Windows XP Pro, RAM 15MB, 64 Bit

BCC DISTRIBUTION'S ADDED VALUE:

One Stop Shopping Vendor:

- Certified RF, Scanner & Printer Equipment Provider: Motorola (formerly Symbol), LXE, Datalogic & Zebra
- Service provider for:
 - *Programming (ABAP/ITSmobile-Netweaver/.Net)*
 - *Installation – All hardware & software*
 - *Consulting: Data Collection, SAP, RF, etc.*
 - *Training*
 - *Support (on-site and phone)*
