

## Store & Forward SAP Mobility & Barcode Automation Designed to Optimize Inventory Control for Warehouse & Field Operations

TranSEND, by BCC Distribution, is SAP-integrated and pre-configured software applications built for inventory control that mobilize and automate SAP IM, WM, EWM, and PM/MRO processes. Dynamically designed for nearly any application, TranSEND natively supports seamless connectivity for **Online, Store & Forward** (online/offline) and **Offline** (batch mode), eliminating concerns associated with SAP system or network inconsistency. Moreover, TranSEND simplifies SAP authentication for RF users via an easy, PIN-based login procedure, enabled and secured via SAP BTP.

TranSEND is designed for SAP business systems, leveraging SAP Business Technology Platform (BTP), Cloud Connector, Mobile Services, and a low-code MDK approach to support our client's preferred connectivity method: 5G/Cellular, Wi-Fi (6), CBRS (private LTE), and/or Batch (cradle-based Ethernet) synchronization. The complete TranSEND solution combines BCCD's optimized software and services, barcoding equipment, and inventory control best practices with SAP S/4HANA Cloud or SAP ECC business environments.

### BCC Distribution's Principles for Proven Success w/ Mobility & Barcode Automation

- ✓ Ease of Use: Simple login, minimal number of screens, fields, words, and user interaction.
- ✓ Simple to modify and maintain SAP RF transactions and screens.
- ✓ Direct connectivity and immediate validation.
- ✓ Return On Investment (ROI).
- ✓ Quick to install.

### Examples of TranSEND Process Transactions for IM/WM/EWM/PM Business Applications

Visit our website for a complete library of TranSEND, TranASAP, TranRFID, or QuickPrint software transactions.

## Benefits of TranSEND

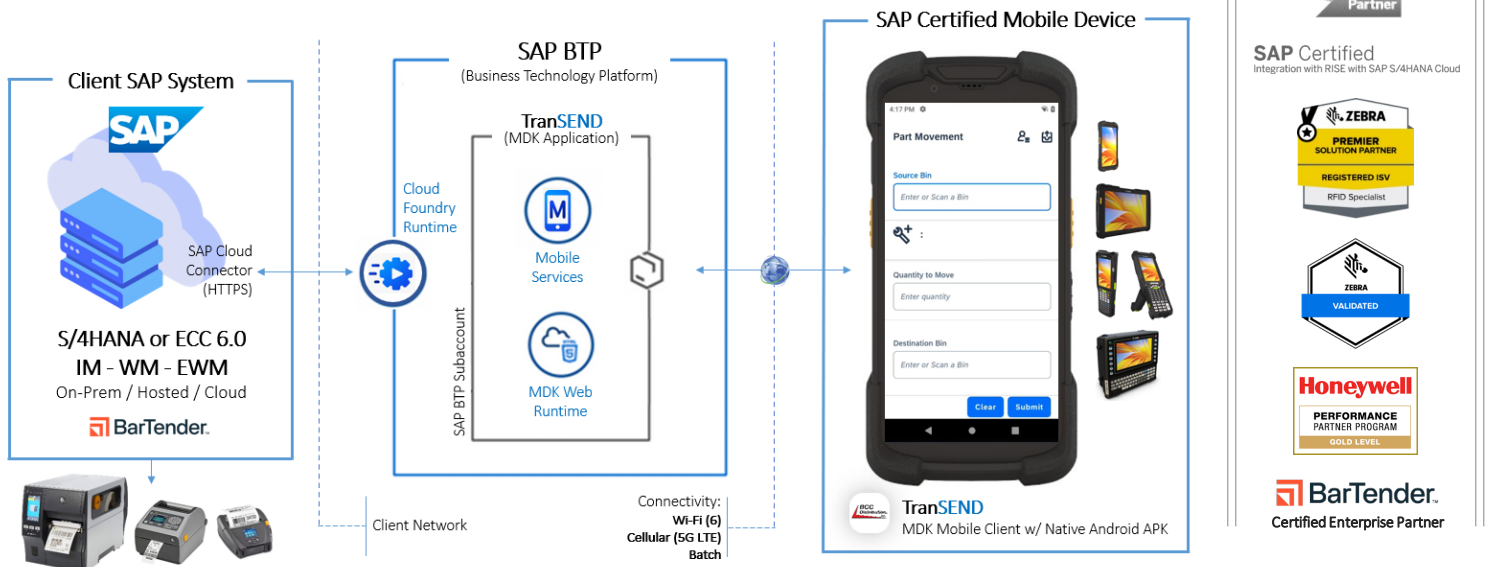

- Online, Store & Forward (online/offline), and **Batch** (offline) modes.
- Native SAP-integration, powered by SAP BTP & Mobile Services.
- Immediate Return on Investment (ROI).
- Simple and secure SAP login and user authentication.
- Seamless connectivity using 5G/Cellular, Wi-Fi (6), and Offline support.
- Rapid implementation, to include system testing, training, and support.
- Less screens, fewer data entry fields, and minimized keyboard data entry (optimized for barcoding).
- Designed for intuitive use to display fewer words and automate/combine transactions.
- Immediate validation at each data entry field, reducing errors and increasing accuracy.
- Scalable: by transaction or site deployment. System grows with a company's needs.

**Start with a single SAP IM/WM/EWM/PM transaction, one device, and one printer.**

## TranSEND™ SAP BTP – RF Scanning System Connectivity

Native SAP RF Framework for SAP S/4HANA Cloud & SAP ECC 6.0

With over 25 years of experience, BCC Distribution takes time to understand your business and process improvement objectives. We work alongside our customers to design and deliver a detailed analysis and blueprint as the starting point of our end-to-end, mobile/RF scanning, data collection, barcode label printing, and RFID automation solutions that work for your business today- plus, are scalable and sustainable for tomorrow.

BCC Distribution is an SAP-certified, software developer, system integrator, and data collection solutions provider. We integrate SAP mobility, RF scanning and data capture technology, barcode label printing automation, and Radio Frequency IDentification (RFID) with a company's SAP S/4HANA Cloud or SAP ECC 6.0 software, to give our customers world class functionality. Combine BCCD's over 350 TranASAP/TranSEND/TranRFID transactions with QuickPrint for a native, turn-key SAP (IM/WM/EWM/PM) RF scanning, barcode label printing, and/or RFID automation solution.
